All LABEL papers have wet strength and anti-mold treatments and meet all requirements for high-speed bottling lines.

Special sheet and roll widths are available as special manufacture orders. All LABEL papers can be made with FSC pulp and with the Master Process™ as special manufacture orders. Master Process™ is an exclusive process patented by Papeterie Zuber Rieder, which combines moisture proof and anti-mold treatments with a coating on the back side of the label. This process allows for prolonged submersion in ice buckets which maintains color integrity, opacity, and guarantees perfect hold of the label without the addition of a protective film, enhancing the appearance of the printing.
